# Oracle Database What's New, What's Next

# What's New?

# Database Release and Support Timelines

**\*Oracle Database 19c is the long term support release. Always check MOS Note 742060.1 for the latest schedule.**

**Premier**

**Waived Extended Support Fee**

**Paid Extended Support**

# Annual Releases Accelerate Innovation

**12<sup>c</sup>**  
RELEASE 2

2017

**18<sup>c</sup>**

2018

**19<sup>c</sup>**

2019

# Oracle Database 12c Release 2 Innovations

- Native Database Sharding
- PDB Clone and Relocate
- Autonomous Health Framework
- Enhanced Database In-Memory
- Online Database Encryption

# Oracle Database 18c Innovations

**12<sup>c</sup>**  
RELEASE 2

2017

**18<sup>c</sup>**

2018

- Active Directory Integration
- Sharded RAC
- PDB Snapshot Carousel
- In-Memory for Key-Value
- Private Temporary Tables

# Oracle Database 19c Innovations

- Streaming Insert for IoT
- Active Data Guard Updates
- Automatic Indexing
- SQL Query of Object Stores
- Global fault-tolerant Key Vault

19<sup>c</sup>  
2019

# New | Streaming Insert for IoT

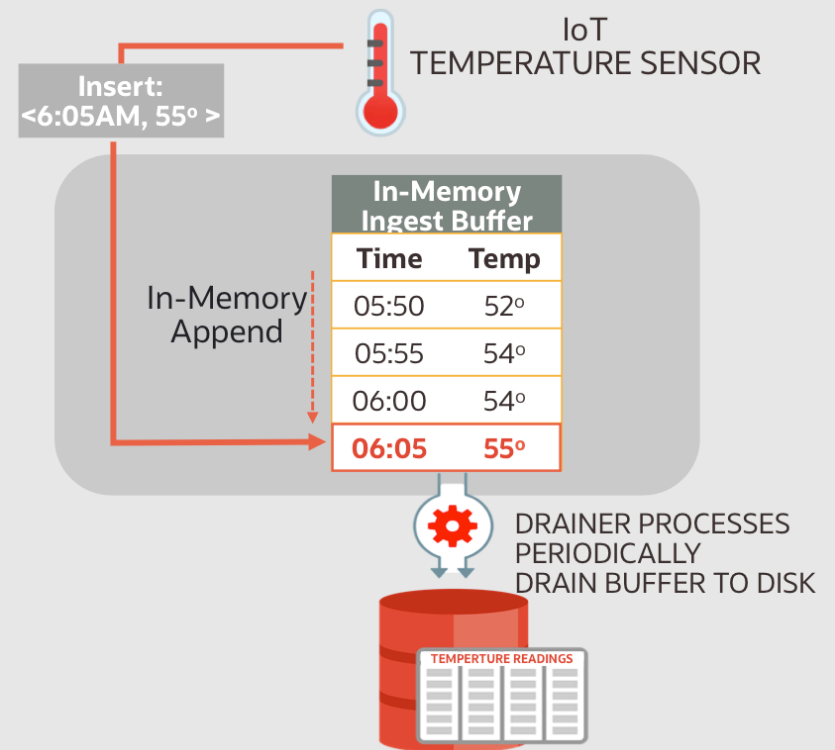

New in-memory insert algorithm

Declare table MEMOPTIMIZE FOR WRITE

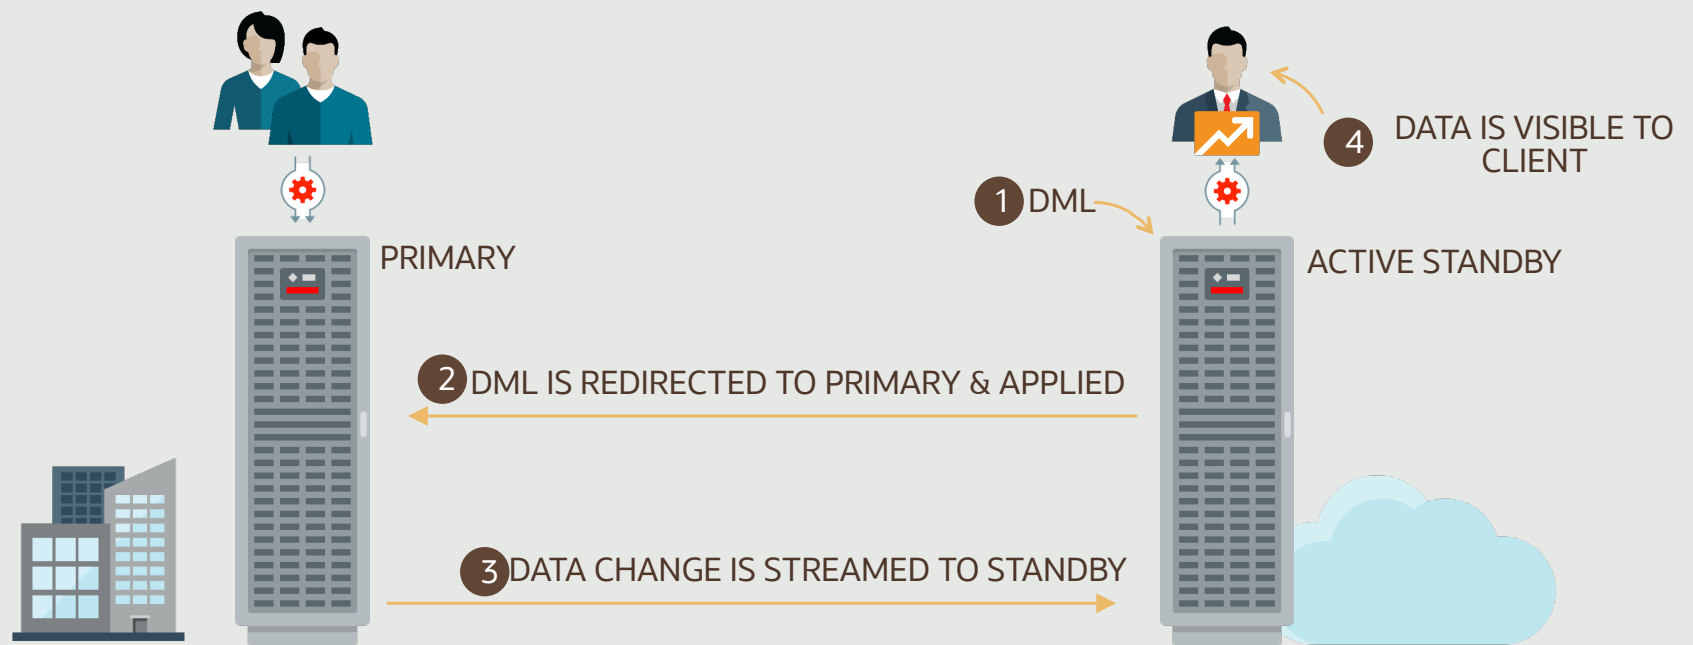

Client performs low-latency insert into in-memory buffer

High throughput bulk insert done asynchronously in background

25 million inserts per second on two socket server

# New | Active Data Guard Standby Updates

# New | SQL Query of Cloud Object Stores

Enables high-performance SQL over

Oracle Object Store

AWS S3

Azure Blob Storage

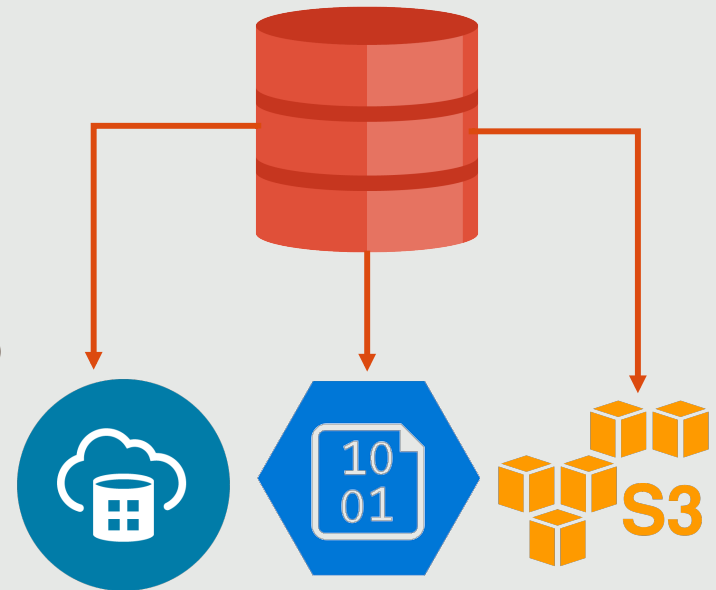

Supports many file formats

Including text, CSV, JSON, Parquet and Avro

Scalable joins with data lakes simplifies

Loading data into data warehouse

Connecting to data lake sources

# New | Automatic Indexing

Self-tuning for transactional and mixed workloads

Or use in advisory mode for existing workloads

Machine Learning continuous monitoring

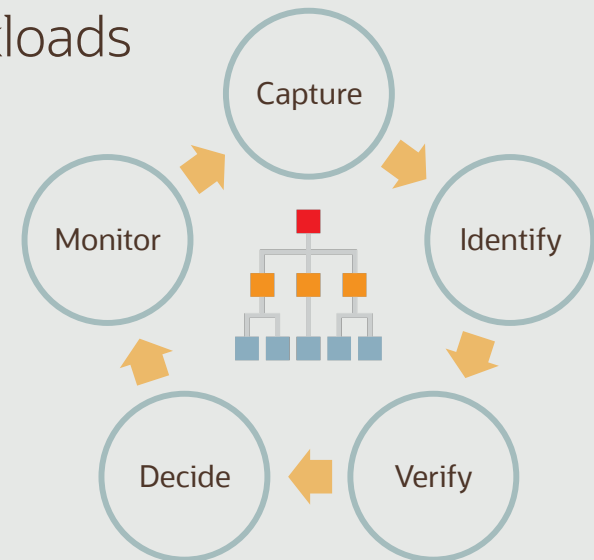

Captures all SQL statements

Identifies **new** SQL plans and indexes

Changes **tested** outside of production

Then **validated** on first execution

All auditable by customer

# New | Global Fault-Tolerant Key Vault

Key Vault stores and manages 1000s encryption keys  
Supports popular hardware security modules

## New **multi-master replication architecture**

Replication across regions for continuous key availability  
Speed of local access with global consistency  
For cloud and on-premises databases

## Why Oracle Database 19c

---

**Has all the innovations in 12cR2, 18c and 19c**

**Long-term support** release for the 12cR2, 18c and 19c family:

**Premier** support to March 2023

**Extended** support to March 2026

Also recently released!

# New | Oracle Exadata X8

Scale-out 2-socket and 8-socket **database** servers

- 15% faster clock rate – latest 24 core Intel Cascade Lake

Fast unified InfiniBand internal fabric

Scale-out intelligent 2-socket **storage** servers

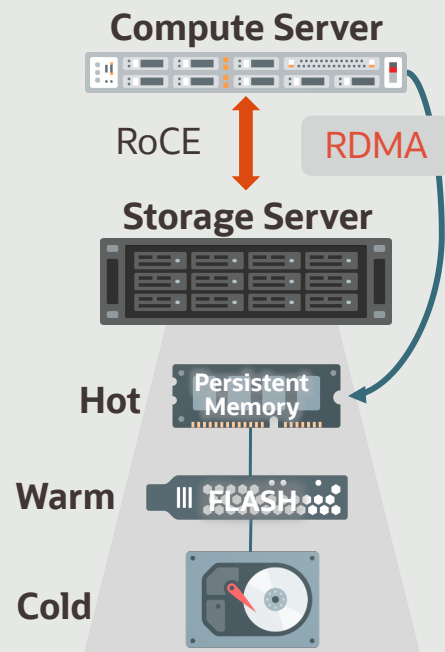

- 60% more processing cores and 40% more storage capacity

NEW Storage Server Extended (XT)

- Low cost storage for infrequently accessed data

# New | Oracle Exadata X8M

- 100Gb Ethernet + RoCE (RDMA over Converged Ethernet)
  - 2.5x faster networking
- RoCE and Persistent Memory (PMEM) for extreme performance
  - Storage Servers feature PMEM Accelerator in front of Flash memory
- Database uses RDMA instead of IO to access PMEM
  - Bypasses the network and IO software stack giving 10X lower latency
- Customers can choose RoCE-based Exadata
  - Or continue to use InfiniBand-based Exadata for compatibility

**<19 usec IO latency**

© 2019 Oracle - NoCOUG Fall Conference 11/21/2019

# New | Autonomous Database Dedicated

Deploy on **dedicated** Exadata Cloud infrastructure

With **guaranteed** 99.995% SLA (< 2.5 minutes downtime per month)

Complete stack is fully **isolated** from other tenants:

Virtual Cloud Network is hardware enforced

Unique **fully isolated private cloud** in Public Cloud

Enables more customer control over updates

Ideal for customers consolidating databases on-prem

# New | APEX on Autonomous Database

## APEX on Autonomous

- Declarative
- Few lines of code
- Robust
- Secure by default

vs.

## JavaScript on AWS

- Hand coding
- Lots and lots of code
- Complex to maintain and diagnose
- Security coded by each developer

**20X faster to develop**  
**100X fewer lines of code**

# New | Free Autonomous Database

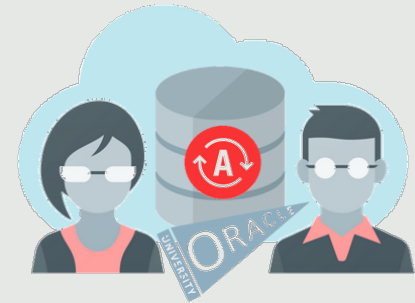

Runs on same infrastructure as ADW/ATP

Always-free “micro” instances with up to

- 2 always free ADB instances per OCI tenancy
- 20 GB database storage per instance
- 1 OCPU per instance

Full functionality, full experience, including

- APEX
- REST Interface (ORDS)
- SQL Developer Web
- Machine Learning Notebooks

# New | Oracle Data Safe

Unified database security control center

Sensitive data discovery

User risk assessment

User activity auditing

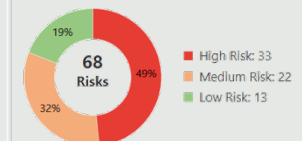

Defense in depth for all customers

Saves time and mitigates security risks

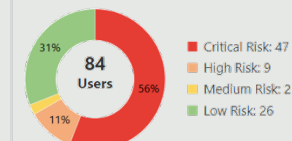

No special security expertise needed

Free with all Oracle Cloud Databases

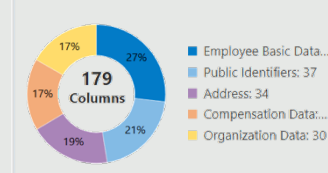

Security Assessment

User Assessment

Data Discovery

# New | Database Features & Licensing App

Part of Oracle Documentation  
Interactively compare releases/features

[apex.oracle.com/database-features/](https://apex.oracle.com/database-features/)

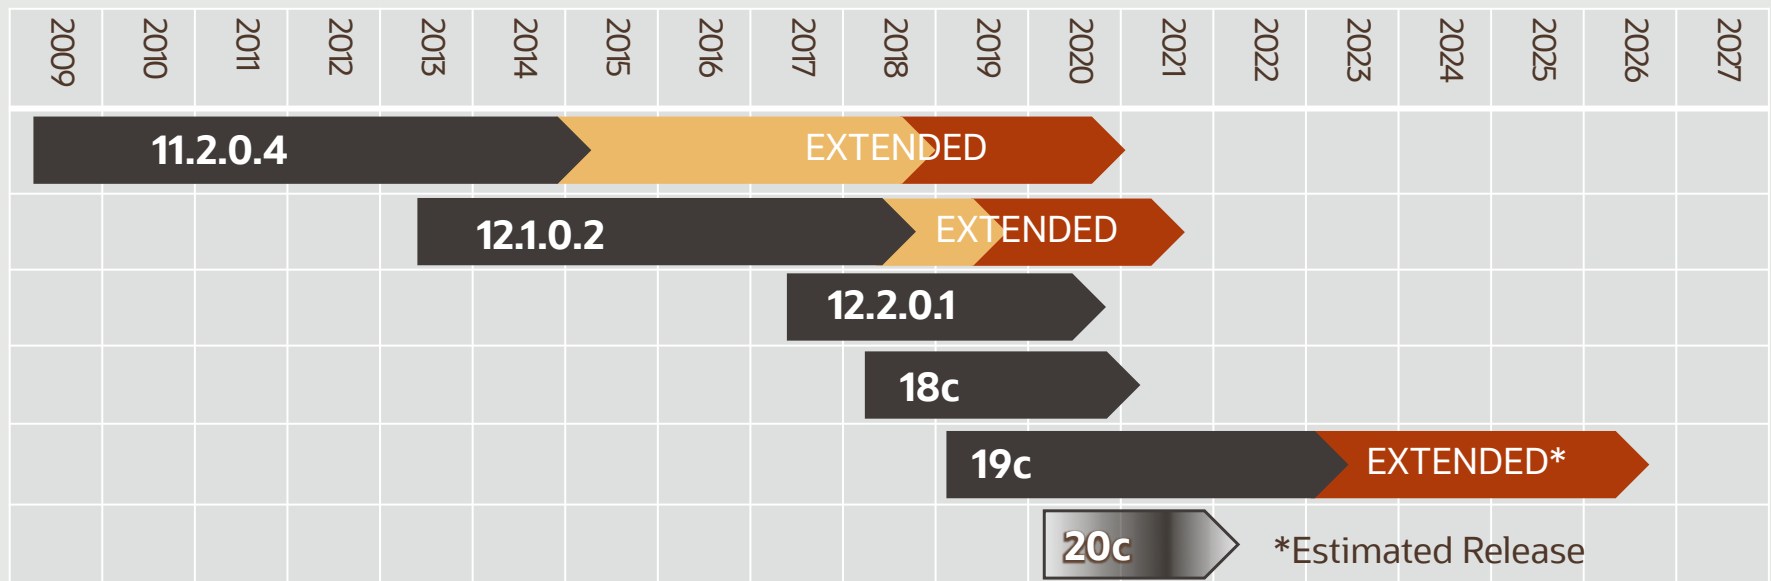

The screenshot displays the Oracle Database Features & Licensing App interface. On the left, there is a sidebar with a search bar, a 'Focus Area' dropdown set to 'All Focus Areas', and a 'Version' section with checkboxes for 11.2, 12.1, 12.2, 18c, and 19c. Below these is a 'New Features only' checkbox and a 'Reset' button. The main area shows a table of features with columns for each version. Features listed include .NET Cloud Development and Deployment, 3D Visualization Framework, 4K Sectors and Metadata Enhancements for Oracle ACFS, ACFS, ADVM and Snapshots on Solaris and AIX, AL32UTF8 As the Default Database Character Set, AQ Rules Engine Fast Evaluation of SYS\_CONTEXT and Other Predicates, and ASM Cluster File System (ACFS). Each feature row has a description and a set of icons (X or green checkmark) indicating its availability in each version.

Feature	11.2	12.1	12.2	18c	19c
<b>.NET Cloud Development and Deployment</b> With ODP.NET, Managed and Unmanaged Drivers can be deployed easily to common hosted and third... 12.2 Release Windows	X	X	✓	✓	✓
<b>3D Visualization Framework</b> This release includes a set of metadata tables to describe themes, scenes, textures, viewpoints, light ... 11.2 Release Spatial	✓	✓	✓	✓	✓
<b>4K Sectors and Metadata Enhancements for Oracle ACFS</b> Oracle ACFS supports I/O requests in multiples of 4096-byte logical sector sizes as well as providing ... 12.2 Release ACFS	X	X	✓	✓	✓
<b>ACFS, ADVM and Snapshots on Solaris and AIX</b> Oracle ACFS, Oracle ASM Dynamic Volume Manager (Oracle ADVM) and Snapshots were delivered in ... 11.2 Release ACFS	✓	✓	✓	✓	✓
<b>AL32UTF8 As the Default Database Character Set</b> The AL32UTF8 character set is now the default for the database character set in Oracle Database ins... 12.2 Release Globalization	X	X	✓	✓	✓
<b>AQ Rules Engine Fast Evaluation of SYS_CONTEXT and Other Predicates</b> AQ rules engine has been enhanced to provide faster evaluation of expressions such as BITAND, CELL,... 12.1 Release AQ	X	✓	✓	✓	✓
<b>ASM Cluster File System (ACFS)</b> The ASM Cluster File System (ACFS) extends Automatic Storage Management (ASM) by providing a r... 11.2 Release ACFS	✓	✓	✓	✓	✓

What's Next?

# Planned Release and Support Timelines

**\*Oracle Database 19c is the long term support release. Always check MOS Note 742060.1 for the latest schedule.**

# De-Support of Non-CDB Architecture

From **Oracle Database 20c** onwards;  
Non-CDB architecture will be de-supported

From **Oracle Database 19c** onwards;  
CDBs can support up to 3 user-created PDBs databases

Multitenant license required for 4 or more PDBs per CDB

# Next | Database Innovation Continues

## Multi-model Enhancements

- Native Blockchain tables
- AutoML

## Better Performance

- JSON binary representation
- Persistent memory store

20<sup>c</sup>

2020

## Next | Native Blockchain Tables

Secure ledger table managed by a trusted provider to prevent fraud

Specialized table that allows normal SQL inserts and queries

```
CREATE BLOCKCHAIN TABLE LEDGER_OF_TRADES
```

Insert-only

Rows are cryptographically chained, chain is verifiable by participants

Blockchain table can participate in queries with other tables

Orders of magnitude easier to use and more functional than existing blockchains

# Oracle In-Database Machine Learning

Bring Algorithms to the Data, Not Data to Algorithms

Oracle natively includes ML algorithms including **deep learning**

Perform parallel ML directly in Data Warehouse or OLTP for fast model building and **real time scoring** of new data

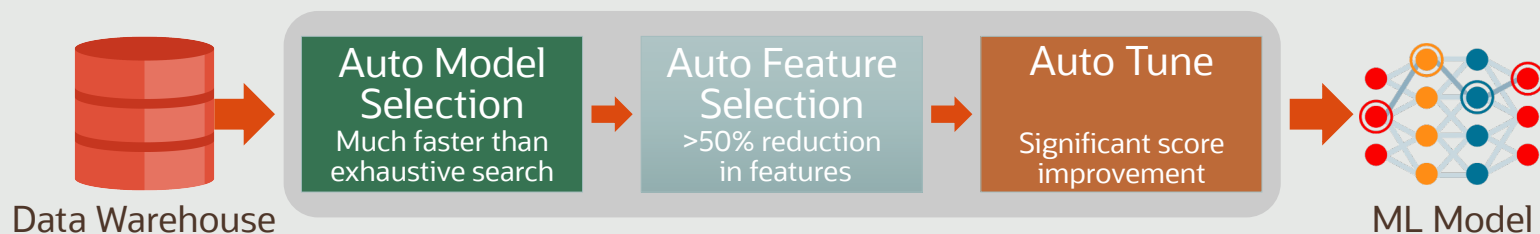

Extend in-database algorithms with Python and R

Easily deploy models via REST API

# Next | AutoML

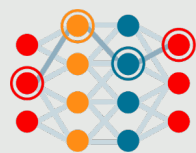

Enables non-expert users to leverage Machine Learning

- Auto Model Selection
  - Identify in-database algorithm that achieves highest model quality
  - Find best model faster than with exhaustive search
- Auto Feature Selection
  - Reduce # of features by identifying most predictive
  - Improve performance and accuracy
- Auto Tune Hyperparameters
  - Significantly improve model accuracy
  - Avoid manual or exhaustive search techniques

# Next | AutoML

Enables non-expert users to leverage Machine Learning

ML Model

Apply

OLTP Data

Better Predictions

- Auto Model Selection
  - Identify in-database algorithm that achieves highest model quality
  - Find best model faster than with exhaustive search
- Auto Feature Selection
  - Reduce # of features by identifying most predictive
  - Improve performance and accuracy
- Auto Tune Hyperparameters
  - Significantly improve model accuracy
  - Avoid manual or exhaustive search techniques

# Next | JSON Speed and Flexibility

New high performance **binary JSON datatype** in SQL and PL/SQL

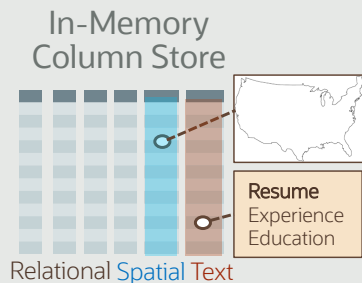

- Scans up to **10x** faster
- Updates up to **4x** faster
- **SQL UPDATE** now allows **SET** and **REMOVE** of JSON elements
- Declarative transformations for JSON

```
CREATE TABLE j_order
(
  id          INTEGER PRIMARY KEY,
  po_doc      JSON
);
```

```
UPDATE j_order
SET po_doc = JSON_TRANSFORM( po_doc,
SET '$.address.city' = 'Santa Cruz',
REMOVE '$.phones[*]?(@.type = "office")'
)
WHERE id = 555;
```

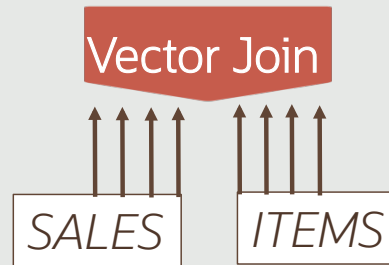

# Next | 20c for Database In-Memory

## In-Memory Spatial and Text

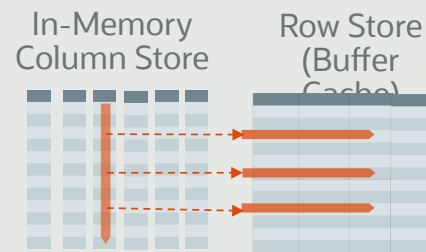

10x faster spatial analytics  
3x faster text analytics

## In-Memory Vector Joins

5-10x faster joins  
using SIMD vector  
instructions

## In-Memory Hybrid Scans

10x faster hybrid  
queries

## Self-Managing In-Memory

Auto in-memory  
populate / evict  
No need to declare  
tables INMEMORY

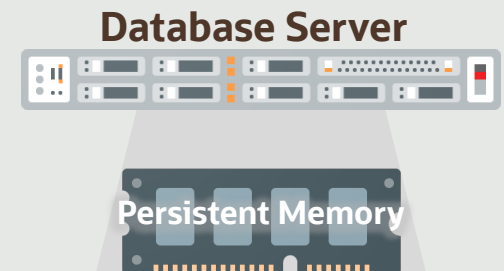

## Next | Persistent Memory (PMEM) Store

Native Persistent Memory Store keeps database data and redo in local PMEM

For workloads that need lower latency than flash memory

SQL runs directly on data stored in mapped Persistent Memory file system

Eliminates IO code path, no need for large buffer cache

## Next | Autonomous Database at Customer

Autonomous Database (ADB) in customer's data center

ADB is **Cloud only** since it automates the entire stack:

- Servers, storage, network, interconnect, software

Some customers cannot move to public cloud

- Regulations, corporate policies, network latency

Managed by OCI public cloud control plane

- Same** Exadata hardware, software, interfaces

- Same** pay-per-use subscription model

# Summary | What's New and What's Next

**Oracle Database 19c** is here and **20c** coming soon

- For on-premises and In Oracle Cloud

**Oracle Exadata X8 and X8M** are here

- NEW Exadata Storage Server Extended (XT)
- NEW Ethernet RoCE and Persistent Memory

**Oracle Autonomous Database** is here

- Choice of serverless or dedicated services
- Run in public cloud or cloud at customer

**Thank You**
